Our Awards

Honest work, a high-quality range of products, and constant progress have borne us fruit in the form of other exceptional awards.

CONSUMERS' CHOICE 2022 – The Best New Product

The exceptionality of sourdough breads of the OSKAR line was confirmed by the **CONSUMERS' CHOICE 2022 – “The Best New Product”** award, which was awarded to us through a survey by the consumers themselves. It is the largest consumer survey in Slovakia, where consumers decide on their choice based on their already gained experience with the product.

Did you know that an award in independent tests like Consumers' Choice is the second most powerful motivation to purchase after a personal recommendation from friends or family?

FéliX Business Award

MINIT Slovakia won the FéliX Business Award in the Outstanding Family Business category. It is a prestigious business award, which is announced by INDEX and Slovenská sporiteľňa in cooperation with professional partners. The FéliX Award focuses on inspiring business or other activities that contribute to prosperity, modernisation, and social responsibility of our country. The Outstanding Family Business category was announced for successful family businesses, where at least two generations are involved in management. The nomination was already a great pleasure to us, the victory is an honour and confirmation that we are going in the right direction.

The awards are a joint victory of all our colleagues, franchisees, and retail partners, who contribute to the success of our products with their work. It is also a challenge to continue development and modernisation.
